

Nick the Shirt Guy.

Just a few things I need to know to start designing your shirt.

1. I need to know what are the basic colours you would like to use? You can use one colour or a mix of primary colours.
2. Are there any club badges or any other logos you want included?
We use full sublimated printing, which produces near photographic results. In other words you can include just about anything you want.
3. Probably one of the most important points, is that of things or colours you most definitely do not want included.
4. Please ask for what you want.
I will tell you if I know it does not work.
If you insist then I will get it for you.
5. I will provide as many designs, free of charge, to get the design you want.
6. There will be other things which we will deal with once the design is started.
